

I have been informed changes may be occurring in Low Power FM stations that could effect my ability to continue to receive K-LOVE radio. This concerns me greatly as I listen to K-LOVE daily and believe it not only ministers to me, but to my family who listens daily and co-workers who have it playing at their desks during the day. New Mexico is often one of the forgotten states, and Carlsbad, NM seems to only be known for it's cave and storage of nuclear waste. It is very difficult to get quality radio programming in this location. I am afraid K-LOVE could be replaced by more country, rap, or rock music of which we have more than enough, or even worse yet, more news. I enjoy uplifting, encouraging Christian music. I appreciate it enough to support this program monthly by my financial contribution. It is the only radio program we support. Please take every effort to prevent the loss of this FM station.
